Lab Sheet 03 – Use Case Diagram

Group ID: 2026-Y2-S1-MLB-B12G1-10

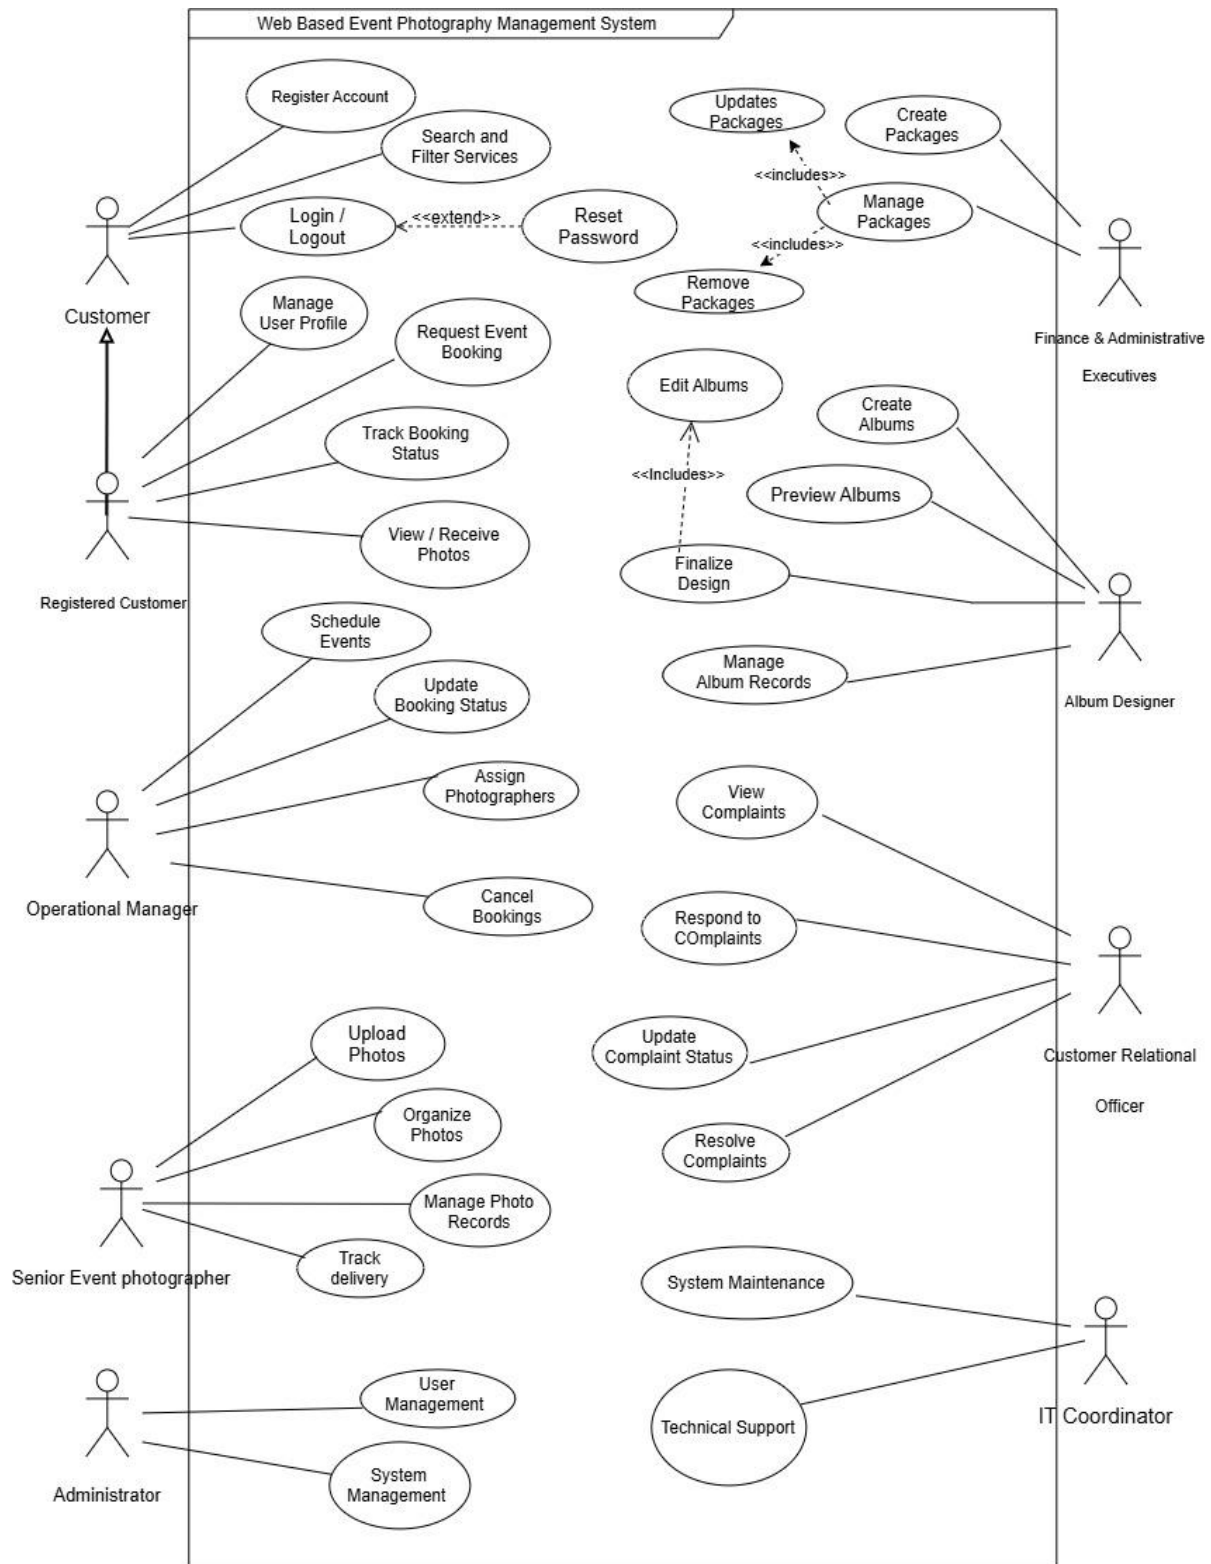

Topic Name: Web Based Event Photography Management System

Group Members:

No.	Student Name	Student ID
01	Dulwan P.M.	IT25101375
02	Jayathilaka W.D.T.L.	IT25102183
03	Gamage T.D.	IT25103111
04	Kaushalya D.M.S.	IT25100396
05	Wijenayake W.M.H.H.	IT25102509
06	Shafky Z.M.	IT25100011

1. Use Case Diagram

The complete Use Case Diagram represents the major users of the Web-Based Event Photography Management System and the functions they perform.

2. Use Case Scenarios

Use Case Scenario 1: Event Booking & Management

Prepared by: Shafky Z.M.

Student ID: IT25100011

Use case number	UC-01
Use case name	Event Booking and Management
Summary	This use case allows customers to submit photography event bookings through the web-based system. The Operations Manager manages submitted bookings, schedules photography sessions, assigns photographers, updates booking information and statuses, and cancels bookings when necessary.
Priority	5 – Critical
Preconditions	• The customer has access to the system. • The customer is registered and logged in when required to perform a booking. • Photography packages and relevant service information are available in the system. • The Operations Manager has valid access to the booking management functions.
Postconditions	• A valid event booking is stored in the system. • The booking contains the required event and photography service information. • The Operations Manager can view and manage the booking. • The booking schedule and assigned photographer are recorded when applicable. • The booking status is updated according to the current stage of the booking.
Primary Actor(s)	Customer
Secondary Actor(s)	Operations Manager
Trigger	A customer needs to request photography services for an event.

Main Success Scenario

Step	Action
01	The Customer logs into the system.
02	The Customer opens the Event Booking function.

03	The system displays the event booking form.
04	The Customer enters the required event details.
05	The Customer selects the required photography service/package.
06	The Customer reviews the entered booking information.
07	The Customer submits the booking request.
08	The system validates the entered booking information.
09	The system creates and stores the booking.
10	The system assigns a booking reference and displays the booking details.
11	The system updates the booking status and notifies the relevant staff member.
12	The Operations Manager views the new booking.
13	The Operations Manager reviews the booking details and schedules the event.
14	The Operations Manager assigns a suitable photographer to the event.
15	The system records the schedule and photographer assignment.
16	The system updates the booking status and makes the updated information available to the Customer.

Extensions

Step	Branching Action
4a	If required event information is missing, the system displays a validation message and asks the Customer to complete the required fields.
5a	If the selected photography service/package is unavailable, the system asks the Customer to select another available option.
8a	If the booking information is invalid, the system highlights the relevant information and prevents submission until it is corrected.
13a	If the requested schedule cannot be accommodated, the Operations Manager selects an alternative available schedule.
14a	If a suitable photographer is unavailable, the Operations Manager assigns another available photographer.

16a	If the booking is cancelled, the system updates the booking status to cancelled and records the cancellation.
-----	---

Open Issues

NO.	Issue for Confirmation
01	Should customers be able to modify their bookings after submission?
02	Should booking cancellation be subject to a specified time limit?
03	Should customers receive notifications for every booking-status change?

Use Case Scenario 2: Photography Package Management

Prepared by: Kaushalya D.M.S.
Student ID: IT25100396

Use case number	UC-02
Use case name	Photography Package Management
Summary	This use case allows the Finance & Administration Executive to create, view, update, and remove photography packages. The function also supports management of package pricing and availability so that customers can access accurate and up-to-date photography service information.
Priority	5 - Critical
Preconditions	• The Finance & Administration Executive is logged into the system. • The user has permission to manage photography packages. • The system is available and the package-management function can be accessed.
Postconditions	• A valid photography package is stored or updated in the system. • Package pricing and availability information is maintained. • Updated package information is available to customers. • Removed or unavailable packages are no longer offered as active packages.
Primary Actor(s)	Finance & Administration Executive
Secondary Actor(s)	Customer

Trigger	A new photography package needs to be created or an existing package needs to be updated, viewed, or removed.
---------	---

Main Success Scenario

Step	Action
01	The Finance & Administration Executive logs into the system.
02	The user opens Photography Package Management.
03	The system displays the available photography packages.
04	The user selects the option to create a new package.
05	The system displays the package creation form.
06	The user enters the package name, description, pricing, and availability information.
07	The user reviews the entered package information.
08	The user selects Save.
09	The system validates the package information.
10	The system creates and stores the new photography package.
11	The system displays the saved package details.
12	Customers can view the updated package information through the system.

Extensions

Step	Branching Action
6a	If required package information is missing, the system requests the missing information.
9a	If the entered pricing or other information is invalid, the system displays an error and prevents saving.
10a	If a package with the same identifying information already exists, the system asks the user to review the existing package.
12a	If a package becomes unavailable, the user can update its availability status or remove it from the active package list.

Open Issues

NO.	Issue for Confirmation
01	Should changes to package pricing require administrator approval?
02	Should customers who have already selected a package be notified when its details change?
03	Should package availability be automatically updated based on business conditions?

Use Case Scenario 3: Album Design Management

Prepared by: Dulwan P.M.

Student ID: IT25101375

Use case number	UC-03
Use case name	Album Design Management
Summary	This use case allows the Album Designer to create, edit, preview, and finalize customer photo albums. The system maintains album records and supports the management of album layouts and content according to customer requirements.
Priority	5 - Critical
Preconditions	• The Album Designer is logged into the system. • The Album Designer has permission to manage album designs. • The relevant customer and event information is available. • The photographs required for the album are available to the system when applicable.
Postconditions	• A customer album is created and stored. • Album layouts and content are updated according to requirements. • The finalized album design is stored in the system. • The album record remains available for further processing or delivery.
Primary Actor(s)	Album Designer
Secondary Actor(s)	Customer
Trigger	A customer photo album needs to be created or an existing album requires editing or finalization.

Main Success Scenario

Step	Action
01	The Album Designer logs into the system.
02	The Album Designer opens Album Design Management.
03	The system displays the available customer album records.
04	The designer selects the relevant customer/event.
05	The system displays the available album information and photographs.
06	The designer creates a new album or opens an existing album.
07	The designer arranges photographs and creates the required album layout.
08	The designer edits the album content and layout as required.
09	The designer previews the album.
10	The designer reviews the album design.
11	The designer finalizes the album design.
12	The system stores the finalized album and updates its status.

Extensions

Step	Branching Action
4a	If the required customer/event record cannot be found, the designer searches using the available search and filtering functions.
5a	If required photographs are unavailable, the designer cannot complete the album until the required photographs are available.
8a	If changes are required after previewing, the designer returns to the editing stage.
9a	If the preview does not meet the required design, the designer modifies the album before finalization.
11a	If the designer is not satisfied with the preview, they return to the editing stage and make necessary adjustments before finalization.

Open Issues

NO.	Issue for Confirmation
01	Should customers be allowed to approve the album design before finalization?

02	Should the system maintain previous versions of album designs?
03	Should finalized albums require additional approval before delivery?

Use Case Scenario 4: Photo Delivery Management

Prepared by: Gamage T.D.
Student ID: IT25103111

Use case number	UC-04
Use case name	Photo Delivery Management
Summary	This use case enables the Senior Event Photographer to upload, organize, manage, and securely deliver completed event photographs to customers. The system also maintains photo records and delivery information.
Priority	5 - Critical
Preconditions	• The Senior Event Photographer is logged into the system. • The photographer has permission to manage photographs. • The relevant completed event booking exists. • The photographs are available for upload.
Postconditions	• Completed photographs are uploaded to the system. • Photographs are organized according to the relevant event/customer. • Photo records are maintained in the system. • Photographs are made available to the relevant customer through the delivery process. • The delivery information is recorded.
Primary Actor(s)	Senior Event Photographer
Secondary Actor(s)	Customer
Trigger	The photographs from a completed event are ready to be uploaded and delivered to the customer.

Main Success Scenario

Step	Action
01	The Senior Event Photographer logs into the system.
02	The photographer opens Photo Delivery Management.
03	The system displays relevant completed event records.
04	The photographer selects the relevant event/customer.
05	The photographer uploads the completed photographs.
06	The system validates the uploaded files.
07	The photographer organizes the photographs according to the event.
08	The photographer reviews the uploaded photographs and records.
09	The photographer confirms that the photographs are ready for delivery.
10	The system records the photo delivery information.
11	The system makes the photographs available to the relevant customer.
12	The system sends an email notification informing the customer that the photographs are available.

Extensions

Step	Branching Action
5a	If an uploaded file does not meet the system requirements, the system rejects the file and asks the photographer to upload a valid file.
6a	If an upload fails, the system displays an error and allows the photographer to retry.
7a	If photographs are incorrectly organized, the photographer rearranges them before confirming delivery.
9a	If the photographs are not ready, the photographer continues managing them without completing the delivery.
11a	If the delivery cannot be completed, the system records the issue and allows the photographer to retry the delivery process.

Open Issues

NO.	Issue for Confirmation
01	What maximum photo upload size should be permitted?
02	Should the system automatically organize uploaded photographs?
03	Should delivered photographs remain permanently available to customers?

Use Case Scenario 5: Promotion Handling & Management

Prepared by: Wijenayake W.M.H.H.
Student ID: IT25102509

Use case number	UC-05
Use case name	Promotion Handling & Management
Summary	This use case allows the Finance & Administration Executive to create, view, update, and remove promotional offers and discounts. The function supports promotional activities intended to attract customers and encourage photography service bookings.
Priority	5 - Critical
Preconditions	• The Finance & Administration Executive is logged into the system. • The user has permission to manage promotions. • The system is available for promotion management.
Postconditions	• A valid promotion is stored in the system. • Promotion details and discount information are maintained. • Active promotions can be viewed and applied according to their conditions. • Expired or unavailable promotions are removed or deactivated.
Primary Actor(s)	Finance & Administration Executive
Secondary Actor(s)	Customer
Trigger	A new promotional offer needs to be created, or an existing promotion needs to be updated, viewed, or removed.

Main Success Scenario

Step	Action
01	The Finance & Administration Executive logs into the system.
02	The user opens Promotion Handling & Management.
03	The system displays existing promotions.
04	The user selects Create Promotion.
05	The system displays the promotion form.
06	The user enters the promotion details and discount information.
07	The user reviews the promotion information.
08	The user saves the promotion.
09	The system validates the promotion details.
10	The system stores the promotion.
11	The promotion becomes available according to its defined conditions.
12	Customers can view applicable promotional offers through the system.

Extensions

Steps	Branching Action
6a	If required promotion information is missing, the system asks the user to complete the required fields
9a	If the promotion information is invalid, the system displays a validation message and prevents saving.
10a	If the promotion conflicts with an existing promotion, the user reviews and modifies the promotion information.
11a	If a promotion reaches its expiry condition, the system marks it as expired or unavailable.
12a	If a promotion is no longer active, customers cannot apply that promotion to new bookings.

Open Issues

NO.	Issue for Confirmation
01	Should promotions require administrator approval before activation?
02	Can multiple promotions be applied to the same booking?

03	Should the system automatically deactivate promotions after their expiry date?
----	--

Use Case Scenario 6: Review & Complaint Management

Prepared by: Jayathilaka W.D.T.L.
Student ID: IT25102183

Use case number	UC-06
Use case name	Review & Complaint Management
Summary	This use case allows customers to submit reviews and complaints after receiving photography services. Complaints are recorded as tickets, allowing the Customer Relations Officer to view, manage, respond to, and resolve customer issues.
Priority	5 - Critical
Preconditions	• The Customer has access to the system. • The Customer has received the relevant photography service or photographs. • The Customer Relations Officer is authorized to manage reviews and complaints. • The system is available for review and complaint management.
Postconditions	• A customer review is stored in the system when submitted. • A customer complaint is recorded as a complaint ticket. • The Customer Relations Officer can view and manage the complaint. • A response can be recorded and communicated to the customer. • The complaint status is updated according to its progress. • Resolved complaints remain recorded in the system for future reference.
Primary Actor(s)	Customer
Secondary Actor(s)	Customer Relations Officer
Trigger	A customer wants to provide a review or is dissatisfied with the service and needs to submit a complaint.

Main Success Scenario

Step	Action
01	The Customer logs into the system.
02	The Customer opens the Review & Complaint Management function.
03	The system displays the options for submitting a review or complaint.
04	The Customer selects the appropriate option.
05	The Customer enters the review or complaint details.
06	The Customer reviews the entered information.
07	The Customer submits the review or complaint.
08	The system validates the submitted information.
09	The system stores the review or creates a complaint ticket.
10	The system notifies the Customer Relations Officer when a complaint requires attention.
11	The Customer Relations Officer views the complaint and relevant information.
12	The Customer Relations Officer updates the complaint status and prepares a response.
13	The system records the response and updates the complaint status.
14	The system makes the response available to the Customer.
15	The Customer can view the response and the updated complaint status.
16	The Customer Relations Officer resolves the complaint when the issue has been addressed.

Extensions

Step	Branching Action
5a	If required information is missing, the system asks the Customer to complete the required information before submission.
8a	If the submitted information is invalid, the system displays a validation message and prevents submission.
9a	If the submission is a complaint, the system creates a unique complaint ticket for tracking.

11a	If additional information is required, the Customer Relations Officer requests further details from the Customer.
12a	If the complaint cannot be resolved immediately, the Customer Relations Officer keeps the complaint open and updates its status.
14a	If the response cannot be delivered, the system records the delivery issue and allows the response to be processed again.
16a	If the Customer is not satisfied with the response, the complaint remains open for further handling.

Open Issues

NO.	Issue for Confirmation
01	Should customers be allowed to edit reviews after submission?
02	Should inappropriate reviews be removed only by the Customer Relations Officer or require administrator approval?
03	Should complaints have different priority levels?
04	Should customers be allowed to reopen a complaint after it has been marked as resolved?

3. Conclusion

The Use Case Diagram and scenarios for the Web-Based Event Photography Management System identify the major users of the system and describe how each user interacts with the system's major functions.

The six major functions covered in this report are Event Booking & Management, Photography Package Management, Album Design Management, Photo Delivery Management, Promotion Handling & Management, and Review & Complaint Management. These functions represent the core operational activities identified in the project proposal.

The individual use-case scenarios provide detailed descriptions of the actors, conditions, triggers, normal system flow, alternative flows, and unresolved considerations for each major function. Together with the complete Use Case Diagram, they provide a structured representation of the functional behaviour of the proposed system.
